

2026 | January Safety Performance

Since the beginning of the year, we have had **FIVE** recordable injuries. One SIF potential event resulted in two recordable injuries and three separate hand injuries. We would like teams to discuss the recent trend and refocus on deliberate execution.

▪ Themes involved:

- Caught between hand and finger injuries
- Securing loads during mobilization and demobilization

▪ Recommended actions:

- Follow SOPs when performing tasks
- Watch out for yourself and others
- Intervene when you see coworkers putting themselves at risk
- Increase engagements on deliberate execution

▪ Help us Own Safety/Lead Safety
