

# 2026 | March Safety Moment

For the March Safety Moment, we want to highlight the SIF Potential Exposure Category that is currently top of mind: Missteps and Falls.

## ▪ **Missteps and Falls:**

- A situation where a person could fall or where a person is working at height greater than 4 feet above the surface

## ▪ **Critical Controls:**

- Maintain 100% fall protection when required
- Ensure ladder is on a stable surface when in use
- Proper railing on elevated walkways

## ▪ **Help us Own Safety/Lead Safety**

- What can we trip over or slip on?
- What can we fall off or fall through?

# 2025 Safety Look Back

- In 2025, we experienced a safety trend over Spring Break
- 4 recordables over three weeks (2 of which had SIFp)
  - Two involved hand placement
  - Two involved using the incorrect tool
- **Call to Action:**
  - Leadership presence in the field is critical during Spring Break
  - Be aware of hand placement and utilizing the correct tool for the job
